

IT'S THE LAW: DO YOU HAVE ONE?

IT IS THE LAW: A written Occupational Health & Safety Program is required for companies who have a total of 20 or more employees (including all site locations). Regulations must be accessible to all employees in your company.

For ease of accessibility and implementation, SICA recommends that a copy of your OH & S Program + Regulations be available at all major construction sites or with Site Superintendents.

SICA offers a ready made Safety Program that has been reviewed by WCB and the Ministry of Transportation. SICA's program will allow you to comply with current OH & S and WorkSafeBC regulations.

To order your program(s), please fill out the form below fax to (250) 491-3929
